

SLURRY SEAL PROJECT UPDATE

Upcoming roadwork in your neighborhood

Pavement preservation starts in August

WHAT IS SLURRY SEAL?

Slurry Seal is a quarter-inch layer of fine gravel, asphalt, and oil that protects the pavement from weather and refreshes the surface. It is most effective on roads that are starting to show their age but have not fallen apart. This method is expected to provide 5-10 years of good pavement condition.

WHAT CAN RESIDENTS EXPECT?

The contractor will maintain access for local residents, mail delivery, garbage pick-up, and emergency vehicles.

There will be parking restrictions from 8:30 am - 4 pm. "No Parking" signs will be posted in advance. Residents who will need to drive in the area on the roadway after application should park on unaffected side streets in advance. **You will not be able to drive on the roadway for 4-6 hours.** Residents can expect to see door hangers and on-street signage with more information prior to construction.

The contractor will sweep streets several times after application.

WHEN

Crews will work from 8 am - 6 pm, Monday through Friday starting in early August.

This project is funded through the Safe Streets & Sidewalks Levy passed by voters in 2016. The nine-year Safe Streets & Sidewalk levy funds street maintenance and safety improvements for neighborhood streets and arterials, including resurfacing, school walk routes, sidewalks, and crosswalks.
